FIRESPRAY

1602 Here's a multi-bloom Tulip that's completely unlike any other Tulip you've ever seen! Here's why! Every bulb produces from 3 to 5 flaming, brilliant scarlet blooms, resembling giant sparks, on the same stem — like a spectacular display of fireworks — and each is practically a bouquet in itself! Only 9-in. tall, they're the brightest of all Tulips! And what could be more ideal for mass plantings — since you get up to five times as many blooms from every bulb! Because it blooms so early, Firespray provides a striking color contrast with Daffodil plantings.

8 for 1.00; 16 for 1.98; 50 for 5.95

OLD DUTCH MIXTURE

1596 A cherished classic Tulip, as popular today as it has been for generations! Originally introduced in the sixteenth century, this **new, improved** strain produces a fantastic array of the most unusual Tulip colors we have ever seen — reds, purples, lavenders, yellows, white — a complete range of colors! Each big, long-stemmed flower is dramatically striped, feathered and variegated in beautiful contrasting colors that will intrigue all who behold them! So distinctive, it really must be seen to be believed! Mixed colors. 22-in. high.

4 for 1.00; 8 for 1.98; 25 for 5.95

DWARF RED EMPEROR

1552 Breck's is justifiably proud to introduce the fabulous Dwarf Red Emperor with its big, early blooming, brilliant scarlet flowers . . . on stems no higher than 5 inches! Flowering early with its "big brother" Red Emperor, the huge blooms actually open up to 7 inches across, with a striking black-and-yellow base. Their short stems make them perfect to plant in rock gardens, edgings, or under Daffodils — creating a magnificent splash of vibrant color! Unique, glossy green foliage provides a rich, contrasting background.

3 for 1.00; 6 for 1.98; 25 for 7.95

TELESTAR★

1567 As excitingly new and attention-getting as its famed, earth-circling satellite namesake! Uniquely shaped, sized and colored, Telestar has curvaceous, "hourglass"-shaped blooms of exquisite carmine — rose with a broad creamy edge — as large as Red Emperor — with a big, colorful star in the center!

3 for 1.00; 6 for 1.98; 25 for 7.95

The Daintiest Tulip Grown!

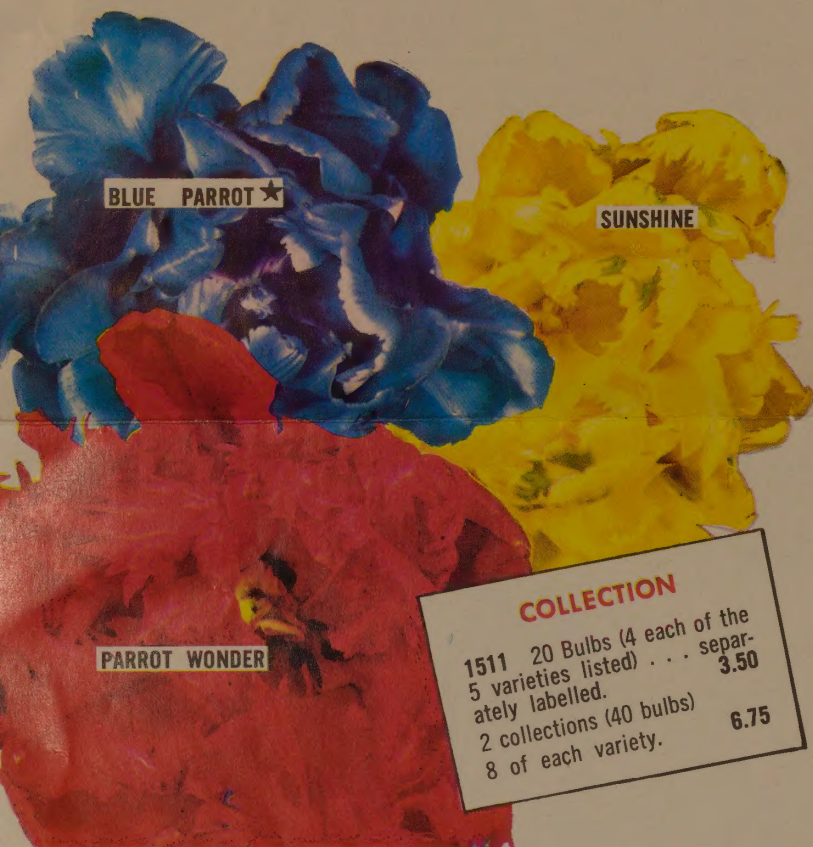

PEPPERMINT STICKS

1599 Dainty, miniature Peppermint Stick Tulips — a rare and unique wild species that were originally discovered in Asia Minor — have smaller blooms than standard Tulips . . . which makes them sized exactly right for delightful effects as edgings, in rock gardens, or in front of evergreens! They're so vivacious, different and attractive, you'll wonder why everyone doesn't grow them!

Each long, pointed petal displays a striking wide triangle of bright cherry-red that stands out against a glistening white background. The inside is just as pretty — a delicate satin-ivory, with a dramatic purple-violet base. Peppermint Sticks' whole effect is one of soft, fragile loveliness that resembles fine bone china — with a bit of the tart, spicy tang of old-fashioned candy — yet every flower is strong and long lasting. Stems are 12 to 14-in. tall.

Peppermint Sticks, being wild Tulips, should be planted in a permanent location, where they can grow and multiply for years. Even the bulbs do not look like ordinary Tulips — being quite small and wearing fleece-lined overcoats to protect them from cold — but they should be planted 4 inches deep in a sunny location.
